INSULATED LEATHER DRIVERS

LINING COMPARISON

3M THINSULATE™

The warmest thin insulation on the market. Thinsulate™ has about 1.5x more warmth than down feather lining and absorbs less than 1% of its weight in water, allowing it to retain its insulating ability even in damp conditions.

FLEECE

Brushed 100% Cotton traps air to keep hands warm. Most commonly used glove lining material.

PILE

Soft, synthetic wool (acrylic) provides excellent insulative properties and will not absorb water.

THERMAL

Economical, Waffle Knit.
100% Cotton fabric.

**Premium Grain Pigskin
#8942**

- 3M Thinsulate™ Lining
- Shirred Elastic Back
